

## **Smokey Bear, Wildfire Over 2 Million**

1995, TV, eng

Wildfire. Over 2 million acres of our forests and rangelands burn each year. Hundreds of homes are destroyed. And it can take over 150,000 firefighters and \$1 billion to bring the fires under control. Many of these fires are due to human carelessness. But it only takes one person to prevent it all. Be careful when visiting the wildlands. For more information, contact your local fire protection agency, State Forestry office, or the USDA Forest Service.
